Subject: MBTA CRMF (MA0003590) - 308 sampling deadline policy

Hi George,

Thanks for your advice this morning, as always!

As we talked about over the phone, Janis Kearney from MBTA expects that MBTA might experience delays in submitting some Northpoint sampling information for the 308 request due June 10. I recommended she include an explanation of the delay in the 308 request and then submit the sampling information as soon as possible, which should be fine, as you said. However, Janis said she would like to speak with someone about OES's policy on 308 request submittal delays, and you mentioned you would be willing to relay that information.

Here is her contact information:

Janis O. Kearney
Director of Environmental Compliance
Assistant General Counsel I
Massachusetts Bay Transportation Authority
10 Park Plaza | Suite 6720 | Boston, MA 02116
(617) 222 1592
JKearney@MBTA.com

Please let me know if there is anything unexpected that comes up during this call/e-mail or I can help otherwise.

Also, I'll make sure to

- 1) leave a copy of the letter from MBTA about Unifirst's alleged impact to MBTA's surface water discharge covered under MA0003590 on your desk tomorrow and
- 2) follow up with you with updates on Unifirst's request to MBTA to (presumably) understand EPA's and, more specifically, the NPDES program's role in relation to their groundwater plume
 - a. the public comment period would be a good opportunity for Unifirst to relay any concerns directly to EPA

Undine
